1. Make sure you have one Google account and have access to Google Drive. (Both are free)
2. Download demo.ipynb file from ICON.
3. Go to Google Colab website and upload the demo.ipynb file.
4. Run (Ctrl+Enter) or modify code cells as your wish.
5. One needs to make a directory called ML19 in your Google Drive root directory to avoid error when storing your learned parameters to Google Drive in the demo.ipynb.
